VERY CONNECTED

**THE WORLD'S  
#1 BEST-SELLING  
PC COMMUNICATIONS  
SOFTWARE**

**THE ONLY SEAMLESS  
ACCESS TO INTERNET, FAX  
& DATA CONNECTIONS**

# Everything You Need To Communicate n-Line

PROCOMM PLUS has everything you need to quickly and easily access the Internet. Even if you have never connected to the Internet, a simple click of your mouse and our stack configuration tools will help you create your new account automatically to connect to a national Internet service provider. If you already have an Internet service provider, you can continue to use your existing connection, or PROCOMM PLUS can automatically configure its TCP/IP stack for your service provider.

## INTERNET

- Total Internet Connection, enhanced Web browser, Internet mail, news reader, FTP, Telnet, Gopher, WINSOCK compliant TCP/IP stack & Internet service provider
- Quickly resize type to improve readability on Web pages from our Quick Select line
- Right mouse button support for saving entire Web page including graphics & backgrounds
- User configurable ACTION BAR® for quick graphical access to your favorite Web sites
- Internet Mail supports MIME and Uuencoding to send and receive binary and image files
- Full Screen viewing lets you use ALL of your screen for viewing Web pages—great for laptops
- Seamlessly forward Web page information via e-mail or fax with the click of the mouse
- Find exactly what you're looking for with the click of an icon using Net Search
- Rapid Connect allows for single click access to your favorite Web sites
- News Reader automatically retrieves and decodes binary file attachments
- Graphical FTP Client that is extremely easy-to-use for Internet file transfers
- Use the FTP Client's Crash Recovery to resume interrupted file downloads
- Use Telnet connection to access remote systems over the Internet
- From the Telnet window use any of our 36 terminal emulations or 11 file transfer protocols

## FAX

- Complete fax capabilities including fax viewer with image zoom and fax rotation for faxes received upside-down
- Graphical Cover Sheet Editor helps you create your own fax cover sheets, or use one of the many cover sheets included
- Fax Scheduler performs fax transmissions and supports binary file transfers (BFT), local and remote polling
- Fax Viewer's annotation tools allow you to insert text and graphics on any fax and forward it on
- No re-entering data with OCR (Optical Character Recognition) which allows you to convert your fax into character based text
- Picture perfect faxes—Fax Deskew straightens out a crooked fax and the Fax Scrubber eliminates those annoying "speck marks" that can occur during transmission
- Use any TWAIN-compliant scanner to add your own images or signature to faxes
- Supports multiple fax modems to send and receive faxes simultaneously
- Merge faxes with your word processor to broadcast or group send documents
- Forward your faxes to another fax machine when you are away
- Fax Request sends faxes to callers—great for sending out sales or customer support literature

## DATA

- New RIPscrip 1.54 emulation offers a point-&-click graphical interface with BBSs
- 36 terminal emulations with keyboard remapping including the new Wyse 60, plus DEC VT100, 220 & 320, Data General D100, D200 & D210, TeleVideo 900 series, IBM 3101, Vidtex & IBM 3270 (asynchronous), Block mode support for IBM 3101 and Wyse 50

- 11 standard error-correcting file transfer protocols including Zmodem, Xmodem, Ymodem, Ymodem-G, 1K-Xmodem, Kermit, CompuServe B+ and IND\$FILE
- View GIF graphic images as you download them
- Easily manage electronic mail messages off-line with QWK Mail editor

## and more...

- Modem Auto-detect automatically detects and installs over 1200 modems
- Our "Road Trip" feature is great for traveling. Enter the Area Code you just traveled to and it automatically adjusts your Connection Directory for all outbound calls
- Advanced ASPECT host script for unattended remote access with electronic mail and file transfers
- Network support for Interrupt 14h, NCSI/NASI and NetBIOS
- Works with either a modem or a LAN connection
- Advanced telephony support for Caller ID and Distinctive Ring; automatically switches to fax mode for fax calls and data mode for data calls
- Store voice telephone numbers in the Connection Directory and PROCOMM PLUS can automatically dial voice numbers for you (requires a telephone handset for your modem)

## ASPECT SCRIPT LANGUAGE...

- Automate all of your frequent PC communications tasks, or even design your own custom interfaces
- Includes pre-recorded scripts to automate connections to CompuServe, MCI Mail and more
- Our intelligent Record Mode automates frequently repeated functions by recording system prompts and responses, and generating an ASPECT script to use in future sessions

**System Requirements:** PROCOMM PLUS requires a computer running Windows 95 or Windows 3.1 or higher in 386 enhanced mode; a hard disk with at least 35 MB of available space (for full installation); 4 MB of RAM minimum, 8 MB recommended; a VGA or higher video display. Supports Hayes compatible and non-Hayes compatible modems as well as direct connections. Includes a Winsock 1.1 compatible TCP/IP stack for dial-up connections. Compatible with most network Winsock stacks. Mouse recommended.

# VERY CONNECTED

**PROCOMM PLUS is the only complete solution to**

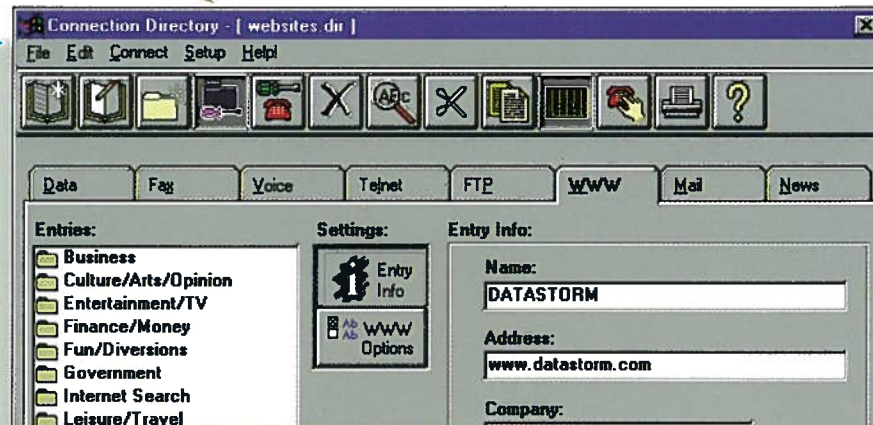

Whether you're "cruising the Internet", sending or receiving a fax, or downloading a file from Fax, Internet and Data functions are all available within one single intuitive interface. PROCOMM PLUS

**access all your PC communications from one source.**

the office or your favorite BBS, PROCOMM PLUS has everything you need to communicate via your PC. allows you to work at your computer the way you think—moving from one activity to the next with ease.

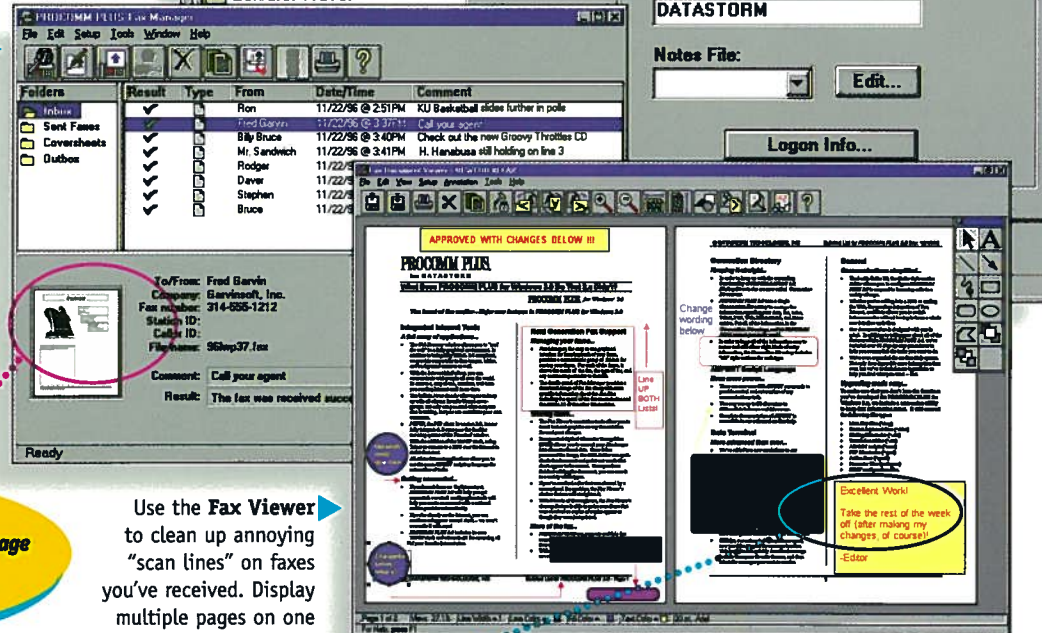

## Connection Directory

At the heart of PROCOMM PLUS is the Connection Directory, the single source for all your data, fax, voice telephone numbers, e-mail, Web, Telnet, FTP and news entries. No need to maintain duplicate entries because PROCOMM PLUS keeps all your information in one easy-to-use Connection Directory. Just click on a directory entry and PROCOMM PLUS automatically adjusts your system's settings and then makes the connection. Whether it's an Internet mail address around the world or a fax machine across town, the Connection Directory efficiently manages all of your connections.

## Fax Manager

Whether you're sending a couple of faxes a week or receiving hundreds a day, Fax Manager is the easy-to-use solution for all your faxing needs. PROCOMM PLUS provides advanced features you won't find on any fax machine. One mouse click and you'll know what faxes you've sent and received, or the status of any pending faxes.

The Fax Manager displays a "thumbnail sketch" of the fax image and provides details of the fax transmission.

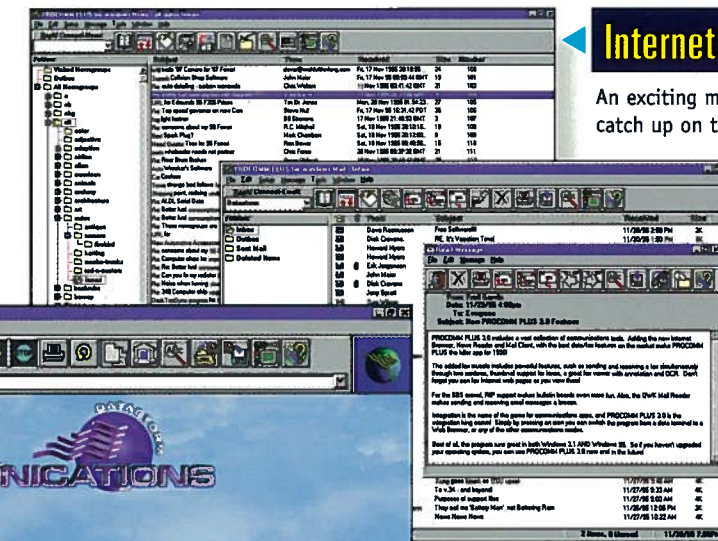

Use the Fax Viewer to clean up annoying "scan lines" on faxes you've received. Display multiple pages on one screen and print only those pages you need. Fax Annotation is great for editing, drawing graphical images and including your comments directly on a fax so you can quickly reply back to the sender or forward the updated fax to others. Optical Character Recognition (OCR) is integrated to convert faxes into character based data so you can easily save faxes in your favorite word processor without having to re-type anything. And with support for TWAIN-compliant scanners, your fax documents can even include your signature.

## Internet News Reader

An exciting meeting place to exchange ideas or catch up on the latest news. The information that interests you the most can be found in over 15,000 Internet newsgroups. Millions of people throughout the world access these active articles to read and contribute their comments. Simply select a News entry from the Connection Directory to start exchanging ideas with others. It's very connected to your connections.

Web Zeppelin is the only Web browser available that can change type sizes "on the fly" from the Quick Select line to improve readability.

## Internet Mail

Whether you want to correspond with business associates or stay in touch with old friends, PROCOMM PLUS's Internet mail provides an easy-to-use solution for sending and receiving electronic mail over the Internet. It's both convenient and inexpensive! And you can send a multi-media message by attaching text, graphics or audio files to any e-mail message. Plus, read your mail off-line to save money on your on-line connect time charges.

## Web Browser

Everything you need to become Very Connected! Whether you're just getting started or an expert, you'll agree that PROCOMM PLUS's new "Web Zeppelin" browser is the coolest way to explore the Internet. It even has entries for the most popular and exciting World Wide Web sites so you can be up and "cruising the Web" in no time!

With support for HTML 2.0 and 3.0 you'll view all the Web sites around the planet in their rich graphical formats.

Only PROCOMM PLUS's seamless integration lets you forward interesting information from a Web site that you have just visited—with a single click of the right mouse button you can fax or e-mail it to a friend who is not yet very connected.

## FTP and Telnet

Transfer files or download software to your PC from any FTP site without having to know unfamiliar commands! Send and receive files from your PC across the Internet from within the intuitive PROCOMM PLUS interface.

Use Telnet to connect to thousands of host computers on the Internet. All Telnet connections can use any PROCOMM PLUS terminal emulation or file transfer protocol for the industry's most versatile Telnet connection.
